About ERYTECH: www.erytech.com

Created in Lyon in 2004, ERYTECH is a French biopharmaceuticals company that opens new prospects for cancer patients, particularly those with acute leukaemia. By encapsulating the asparaginase enzyme in red blood cells, ERYTECH has developed GRASPA[®], an original and effective treatment that targets leukaemia cells through “starvation” while significantly reducing the side effects for patients. GRASPA[®] is currently completing Phase III clinical development in Acute Lymphoblastic Leukemia (ALL) and is in Phase II clinical trial in Acute Myeloid Leukemia (AML). ERYTECH has concluded distribution partnership agreements for Europe with the Recordati-Orphan Europe group, and with TEVA for Israël. In the United States, ERYTECH is launching a Phase I clinical trial in ALL, after having received approval from the US FDA..
